Foreword

This document provides guidance to organisations seeking accreditation (or re-accreditation) with the Medical Sciences Council of New Zealand (the Council) for a qualification programme that is fit-for-purpose in terms of registration in the medical laboratory technician scope of practice.

It explains the standards and criteria against which the Council assesses qualification programmes for the purpose of accreditation and the documentation an organisation is expected to submit in support of its accreditation application/review. Accreditation processes are described according to three distinct categories of accreditation assessment:

1. Programmes that have been previously accredited by the Council
2. A new programme in medical laboratory science
3. A major structural change in an accredited programme

The Council acknowledges that accreditation of qualification programmes pertaining to health professions is not unique to the practice of medical laboratory science. All sixteen health regulatory authorities (RA) in New Zealand have adopted models of accreditation in alignment with registration of health practitioners under the Health Practitioners Competence Assurance Act 2003. (Additionally many of these accreditation frameworks have been developed in collaboration with relevant Australian accreditation bodies and subsequently for a number of health profession-related qualification programmes, joint Trans-Tasman standards and procedures have been adopted).

The enclosed guidelines have drawn on the Council’s previous accreditation framework and the accreditation standards and processes of other health regulatory authorities. It is envisaged that this approach will attain a degree of consistency in the accreditation standards and processes required of New Zealand providers of health professions-related qualification programmes.
Section One: Introduction

Purpose of Accreditation

The Medical Sciences Council of New Zealand has an obligation under Section 12 of the Health Practitioners Competence Assurance Act 2003 to accredit and monitor New Zealand qualification providers of qualification programmes (the programme) prescribed by the Council for the purpose of registration in the medical laboratory technician scope of practice.

Accreditation is the status granted by the Council to medical laboratory science qualification programmes that meet statements of educational/qualification quality expressed as education standards and criteria. Accreditation is about assuring the quality of education and qualification programmes and promoting continuous improvement of quality to respond to evolving community needs and professional practice, and ensure the safety of the public.

Accreditation pertains to the procedures used to review and assess qualification programmes against the required standards and to recognise the programmes as meeting the stated accreditation standards.

The Council's accreditation framework is focused on assuring graduates of Council-approved qualification programmes enter the profession with a sound knowledge and skills base to practise as a medical laboratory technician safely, ethically and effectively. There is an expectation that graduates of the programme will have a solid foundation for lifelong learning, continuing competence, and ongoing development of professional knowledge and skills.

The Council has separately published a set of core competencies required for New Zealand registration as a medical laboratory technician. It is expected that organisations seeking to have their programmes accredited by the Council will use those documents to inform the development, implementation, and ongoing review and monitoring of the programme.

Principles of Accreditation

Critical to the Council's accreditation framework is the concept of fitness for purpose with a focus on the stated aims and objectives and the achievement of those in alignment with the required competencies for medical laboratory technician.
Accreditation Standards

The Council has defined six broad categories of accreditation standards:

1. Programme outcomes and context
2. Curriculum
3. Learning teaching and assessment
4. Monitoring
5. Students
6. Learning environment

Each standard encompasses a number of assessment criteria against which the programme is assessed.

Supporting Documentation Guidelines

The Council has listed a set of *Supporting Documentation Guidelines* (see Section 3) to assist the qualification provider in their self-assessment and preparation of their accreditation submission responses. These have been presented as a separate section in an effort to provide qualification providers with a ready reference guide when preparing the documentation in support of their accreditation assessment.

Accreditation Procedures

In Section Four of these guidelines the Council describes the procedures it uses to undertake an accreditation assessment.

The Council undertakes re-accreditation assessments within two distinct circumstances:

1. A programme that has been previously accredited by the Council.
2. A major structural change in an accredited programme.

The Council also undertakes accreditation assessments for:

1. A new programme in medical laboratory science.

The Council may also consider undertaking an accreditation review in response to significant concerns about a qualification programme as raised by stakeholder groups (including students).
## Accreditation Outcomes

The Council has adopted the following framework in respect of the possible outcomes for a re-accreditation assessment (4.1):

<table>
<thead>
<tr>
<th>Accreditation Outcome</th>
<th>Outcome Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Accreditation</td>
<td>The programme has achieved or exceeded the minimum standards for accreditation and has no serious deficits or weaknesses. Recommendations or suggestions relating to enhancement of the programme are generally included in the accreditation report. Retention of this accreditation status is for a period of 5-years and remains subject to receiving satisfactory annual reports which include progress on recommendations and suggestions in the accreditation report.</td>
</tr>
<tr>
<td>Accreditation with Conditions</td>
<td>The programme substantially meets the accreditation standards but has serious deficits or weaknesses in one or more areas. It is expected the deficits/weaknesses can be corrected within a specified period of time. The qualification provider is required to submit evidence-based progress reports at intervals as stated in the accreditation report (as a minimum, progress reports will be required annually).</td>
</tr>
<tr>
<td>(a) Accreditation with Conditions: Maximum Period of Two Years</td>
<td>The deficiencies/weaknesses of the programme are considered to be able to be corrected within a period that does not exceed 2-years.</td>
</tr>
<tr>
<td>(b) Accreditation with Conditions: Maximum Period of One Year</td>
<td>The deficiencies/weaknesses of the programme are considered to be of such a magnitude that, if not corrected, the programme will be on the pathway to refusal of accreditation. Evidence of significant progress must be demonstrated within 1-year in order to maintain accreditation of the programme. If the serious deficits/weaknesses as in (a) and (b) above are not addressed within the specified period of time:</td>
</tr>
<tr>
<td>(c) Notice of Intent to Refuse Accreditation</td>
<td>The programme has failed to submit a required progress report to address the conditions on its accreditation, or the report was considered unsatisfactory. The Council will inform the qualification provider of the intent to refuse accreditation at the end of the next academic year for the programme.</td>
</tr>
<tr>
<td>Refusal of Accreditation</td>
<td>Accreditation may be refused when the Council considers that the deficits in the programme are so serious as to warrant that action or where the qualification provider has not satisfied the Council that the complete programme can be implemented and delivered at a level consistent with the Council's Accreditation Standards.</td>
</tr>
</tbody>
</table>
The following accreditation outcomes apply in respect of new programmes and programmes undergoing a major change:

<table>
<thead>
<tr>
<th>Accreditation Outcome</th>
<th>Outcome Description</th>
</tr>
</thead>
</table>
| Accreditation with Conditions          | Accreditation of a new programme (or programme undergoing a major change) is granted with conditions for a period of **up to 2-years** after the full programme has been implemented. This is subject to conditions being addressed within a specified period and submission of satisfactory reports (either annual or as otherwise specified).  
  Conditions may relate to the progressive implementation of the new programme (or major change) and the provision of adequate staffing and facilities to support the developing programme. |
| Refusal of Accreditation                | Accreditation may be refused if it is considered that a proposed programme has serious deficits.  
  In situations where identified deficits are deemed as needing resolution prior to the programme commencing, accreditation is likely to be refused. The qualification provider will be advised on the deficits to be addressed prior to a reconsideration for a further accreditation assessment. |
Section Two: Accreditation Standards

Standard 1: Programme Outcomes and Context

1.1 Purpose

1.1.1 The qualification provider has defined the purpose of the programme including learning, teaching, research, societal and community responsibilities.

1.1.2 The programme’s teaching, service and research activities are related to the health care needs of the communities the qualification provider serves.

1.2 Programme Outcomes

1.2.1 The programme has defined graduate outcomes consistent with the Council’s requirement for entry-level practitioners to demonstrate competence to practise safely and effectively in New Zealand, and who have an appropriate foundation for lifelong learning.

1.2.2 The principles of Mana Maori and the Treaty of Waitangi are upheld as appropriate in the programme.

1.3 Governance

1.3.1 Governance structures and functions are clearly defined and understood by those delivering the programme.

1.3.2 Governance structures set out the qualification provider’s committee structure which informs and supports the programme including the composition, terms of reference, powers and reporting relationships, and allow for relevant representation in decision-making.

1.4 Programme Management

1.4.1 There is a designated committee or similar body that has the delegated authority, responsibility and capacity to plan implement and review the curriculum to achieve the objectives of the programme.

1.4.2 The level of qualification offered is assessed against any national standards.
1.5 Budget and Resource Allocation

1.5.1 The qualification provider has identified the lines of responsibility and authority for the programme.

1.5.2 There is sufficient autonomy for the qualification provider to direct resources to achieve the purpose and objectives of the programme.

1.5.3 There are sufficient financial resources and financial management capacity to sustain the programme.

1.6 Personnel Resources and Capability

1.6.1 There is appropriate executive oversight to meet the objectives of the programme.

1.6.2 Personnel are adequate in number and appropriately qualified to administer the programme.

1.6.3 Personnel who set or moderate the programme have relevant qualifications and experience in medical laboratory science.

1.6.4 There is a process for examiner appraisal and development.
Standard 2: Curriculum

2.1 Duration of the Programme

2.1.1 The programme is of sufficient duration to ensure the defined graduate outcomes can be achieved.

2.2 Content of the Curriculum\(^1\)

2.2.1 The curriculum contains the foundation clinical, diagnostic, communication, management and procedural skills to enable graduates to assume responsibility for safe patient care at entry to the medical laboratory technician scope of practice.

2.2.2 The curriculum is based on principles of scientific method and evidence-based practice, and fosters the development of analytical and critical thinking.

2.3 Curriculum Design and Description

2.3.1 The curriculum is based on an integrated programme of academic and clinical study of medical laboratory science that maintains currency of practice.

2.3.2 The qualification provider demonstrates effective communication of specific learning outcomes or objectives describing what is expected of students at each stage of the programme.

2.4 Maori Health

2.4.1 The programme provides curriculum coverage of Maori Health and its application to medical laboratory science

---

\(^1\) See Appendix 1 for a detailed description of the specific topics to be covered in curricula
3.1 Learning and Teaching Methods

3.1.1 A range of learning and teaching methods are used to meet the outcomes of the programme.

3.1.2 Students are encouraged to evaluate and take responsibility for their own learning and prepare themselves for lifelong learning.

3.1.3 The programme enables students to develop core skills prior to using those skills in a clinical setting.

3.1.4 Students have sufficient supervised involvement with laboratory practices to develop their clinical skills to the required level and with an increasing level of participation in clinical care as they progress through the programme.

3.2 Assessment Approach

3.2.1 The qualification provider has clearly stated assessment policy that describes its assessment philosophy, principles, practices and rules. Assessment aligns with learning outcomes and is based on objectivity, fairness and transparency.

3.2.2 The programme clearly documents its assessment and progression requirements and ensures this information is accessible to all staff and students.

3.2.3 The assessment framework ensures a balance of formative and summative assessments.

3.3 Assessment Methods

3.3.1 Students are assessed throughout the programme through the use of fit-for-purpose assessment methods and formats that align with the intended learning outcomes.

3.3.2 There is a framework to guide the assessment of students for each year of the programme.

3.4 Assessment Feedback

3.4.1 There are processes for the timely identification of underperforming students and subsequent remediation.

3.4.2 Students’ learning is guided through the provision of regular feedback following assessments.
3.5 Assessment Quality

3.5.1 The qualification provider regularly reviews its programme of assessment including assessment policies and practices such as standard setting, quality of data, and attrition rates.
Standard 4: Monitoring

4.1 Monitoring

4.1.1 The qualification provider regularly monitors and reviews its programme including the curriculum content, and quality of assessment. (There is a schedule for all courses to be externally moderated by appropriate academic and clinical personnel). Concerns about, or risks to, the quality of any aspect of the programme are managed in a timely and effective manner.

4.1.2 Feedback is systematically sought from programme personnel and students and analysed and used to inform the monitoring and development of the programme.

4.2 Outcome Evaluation

4.2.1 The qualification provider analyses the performance of cohorts of students and graduates in relation to the objectives of the programme.

4.2.2 The qualification provider evaluates the outcomes of the programme.

4.3 Feedback and Reporting

4.3.1 Programme evaluation results are reported within the qualification provider’s governance structures and to programme personnel and students.

4.4 Continuous Improvement

4.4.1 The qualification provider has addressed the recommendations made in the report of the previous accreditation visit (if applicable) and in any other reports since that time.
Standard 5: Students

5.1 Admission and Selection

5.1.1 The qualification provider has defined the size of the student intake in relation to its capacity to adequately resource the programme at all stages.

5.1.2 There are clear selection and admission policies and processes that are practically sustainable, consistently applied, and are free of discrimination and bias (other than explicit affirmative action in favour of nominated groups, including Maori as tangata whenua).

5.1.3 Information on the selection processes, including the mechanism for appeals is publicly available.

5.2 Student Support

5.2.1 The qualification provider has mechanisms for identifying and supporting students who require health and academic advisory services including students with disabilities, students with mental health needs, and students at risk of not completing the programme.

5.3 Professionalism and Fitness to Practise

5.3.1 The qualification provider has policies and procedures for identifying and supporting students whose professional behaviour and/or health status (including physical and mental) raises concerns in respect of their fitness to practise as a medical laboratory technician or ability to interact with patients (where relevant).

5.4 Student Representation

5.4.1 There are formal processes and structures to facilitate and support student representation in the governance of the programme.
Standard 6  Learning Environment

6.1  Information Resources and Library Services

6.1.1  The qualification provider has sufficient information communication technology infrastructure and support systems to achieve the objectives of the programme.

6.2.3  Students have access to computer-based reference systems and reference collection that is adequate to meet curriculum and research needs.

6.2  Clinical Supervision

6.2.1  There is an effective system of clinical supervision to ensure safe involvement of students in clinical practice.

6.2.2  The qualification provider ensures that objectives and methods of assessment in clinical competence are defined and known to students and supervisors.

6.2.3  The qualification provider has defined the responsibilities of medical health practitioners who support students during the clinical components of the programme.

Section Four: Accreditation Procedures

Accreditation Review Process: An Overview

• The Council contacts qualification provider to advise of pending accreditation review and closing date

• The Council liaises with qualification provider on dates and funding for accreditation visit and selects Accreditation Team

• The Council consults the qualification provider and selects Accreditation Team, finalises accreditation protocol and funding arrangements

• The Council undertakes a survey of employers of graduates and laboratories involved in providing clinical practice experiencers for students. Report on the survey outcomes are prepared for the Accreditation Team

• Accreditation documentation submitted by the qualification provider in both hard copy and electronic format at an agreed time before the accreditation site visit (usually 6-12 weeks prior to the Accreditation Team visit)

• Accreditation Team provided with all accreditation documentation and has a teleconference prior to the visit to discuss the accreditation documentation received and confirm the programme for the visit. Qualification provider is contacted for any additional information required

• Accreditation visit commences. Interviews are conducted with relevant groups and individuals and team views the various facilities as per the agreed accreditation visit programme.

• Accreditation Team compiles a draft report within 2-4 weeks of the accreditation visit

• Draft report sent to the qualification provider for correction of any errors of fact (usually within 4-6 weeks of receipt of

• Accreditation Team finalises its report and submits to the Council’s Education Committee

• The Council’s Education Committee considers report and makes a recommendation to the Council on the accreditation status of the programme. The Council considers the recommendations and resolves the details of the accreditation decision

• The Council notifies the qualification provider and monitors the accredited programme. The qualification provider submits annual reports to the Council’s Education Committee and details of changes made (and any other reports at intervals as required by any condition of accreditation)
Accreditation Review Process

Principles of the Accreditation Review Process

The accreditation review process is intended to be conducted through a positive, constructive and collegial approach, the critical driver being the best interests of the community's health needs and the protection of the public. The accreditation review is founded on a self-assessment process by the qualification provider to enable strengths and weaknesses of the programme to be identified.

The Council undertakes regular reviews of its accreditation processes including feedback from qualification providers, laboratory personnel, and accreditation teams.

Preparation by the Qualification provider

The accreditation review is not limited to the Accreditation Team's visit and meetings. The process starts with the qualification provider undertaking a process of self-assessment and analysis and the development of a documented accreditation submission.

Accreditation Submission

The qualification provider is expected to begin preparing its accreditation submission well in advance of the accreditation visit. A copy of the Council’s Accreditation Standards and Procedures are provided to the qualification provider prior to the review to assist with the development of the accreditation submission.

Typically, the completed accreditation submission will be required 6-12 weeks prior to the actual review visit.

The accreditation submission forms the basis for the review. It describes the qualification provider's programme, policies and processes and contains the provider's self-assessment of its strengths as well as actions to address any identified weaknesses and future challenges.

Accreditation Team

The Council appoints an Accreditation Team as recommended by the Education Committee. Team membership will provide for a blend of assessors from various practices within the profession and be balanced in terms of accreditation experience. Team members are recruited from New Zealand and Australia.

An Accreditation Team typically comprises three - four assessors who have the following attributes:
- Experience in academic management and best practice teaching and learning methods
- Expertise in the delivery of academic programmes relevant to the profession
- Senior experience and expertise within a scope of practice appropriate to the programme being assessed

The Council's Registrar is also a member of each Accreditation Team.

---

**Surveys**

In addition to information gained directly from the qualification programme the Accreditation Team also seeks feedback from relevant stakeholders through the use of survey questionnaires. Specifically survey questionnaires are sent to employers of graduate cohorts and laboratory staff who have specific roles in supporting students during their clinical practice.

Surveys of these stakeholder groups are conducted prior to the accreditation visit and are used to inform the Accreditation Team of any particular issues to be addressed with the qualification provider during the site visit.

---

**Accreditation Visit**

The Accreditation Team's preliminary assessments of the appropriateness and effectiveness of the qualification provider's programme and processes are based on the provider's accreditation submission. The accreditation submission also informs the framework of the Accreditation Team's report.

The Registrar liaises with the qualification provider on behalf of the Accreditation Team to advise of programme personnel the team wishes to interview and the teaching resources they wish to observe. Interviews may be managed through an on-site visit to the qualification provider's facilities and/or through audio-visual conferencing. An accreditation site-visit plan (if applicable) is agreed between the qualification provider and the Registrar (on behalf of the Accreditation Team).

The Accreditation Team focuses on two objectives: firstly to validate standards and secondly to review the academic curriculum through a process that recognises expertise on both sides and seeks to improve performance through discussion and constructive feedback.

The Accreditation Team must maintain a proper professional perspective throughout the process so as to deliver objective, unbiased and fair outcomes. Consequently team members limit their interaction with qualification provider personnel and stakeholders during the period of the accreditation review to occasions and purposes that are directly related to the review. The Team also allows adequate time throughout the duration of the review for team discussion, analysis, writing and planning.
Accreditation Report

The accreditation report follows the structure of the Council's Accreditation Standards and includes the Accreditation Team's comments and observations of the qualification provider's submission and arising from the accreditation visit. The report includes a summary of the Team's views and assessment and makes suggestions and recommendations arising from their assessment of all aspects of the programme.

The qualification provider is invited to comment on the factual accuracy of the Team's draft report prior to it being finalised for presentation to the Council's Education Committee. The Committee reviews the report and then forwards that along with its accreditation recommendation to the Council for the final accreditation decision to be made.

Confidentiality of Information

To meet the high standards of its accreditation framework, the Council requires a considerable amount of information from qualification providers, both in accreditation applications and in subsequent written submissions, as well as during site visits. This may include information of a sensitive nature such as personnel plans, financial information, transparent appraisal of strengths and weaknesses, and commercial-in-confidence material.

The Medical Sciences Council requires Accreditation Team, Education Committee, Council members and secretariat staff to maintain confidentiality in respect of all material received from the qualification provider for the accreditation of their programme. Such information will only be used for the purpose for which it was obtained in conjunction with the Council accreditation process.

A final decision on accreditation is only made when the Education Committee and the Council have considered the report from the Accreditation Team. Consequently the recommendation on accreditation is confidential until the Council has confirmed the status and period of accreditation and any conditions that may apply to that accreditation.

Annual Reports

A critical component of the accreditation process is the Council’s ongoing monitoring for each of its accredited programmes.

An annual report, including details of any major changes (planned or unplanned), is required from each qualification provider for each accredited programme. The qualification provider is responsible for ensuring the Council is informed, through the annual report, of any planned significant changes of programmes prior to them being implemented. The Council may seek external academic and/or clinical advice as required. Suggestions and recommendations as contained in the accreditation report are to be addressed and documented in the annual report.

2 See Page 29 for criteria on what constitutes a “major change”
The annual report is considered by the Council’s Education Committee who then makes any recommendations to the Council in respect of the report (including any concerns about the continuing accreditation status for the qualification provider).

**Specific Reports**

Specific reports (that are in addition to the annual report) may be required from qualification providers where programmes are granted a shorter period of accreditation or where there are conditions on accreditation. Additional reports may also be requested when information available to the Council indicates there may be matters of concern in respect of the continued accreditation status of a programme.
Accreditation Review of a Previously-Accredited Qualification

The Council will notify qualification providers in advance about forthcoming accreditation reviews and key dates and to negotiate mutually acceptable timing and arrangements.

The accreditation review is carried out in accordance with the *Accreditation Review Process* as set out in the preceding section.
Accreditation of a New Qualification

Accreditation of a new programme is a three-step process, commencing with the qualification provider advising the Medical Sciences Council that they wish to have a specific qualification programme considered for accreditation under the Health Practitioners Competence Assurance Act 2003.

Prior Notification of a Proposed New Qualification

Existing accredited providers or new providers of a medical laboratory technician qualification programme, must advise the Council well in advance of their intention to introduce a new programme. Notice of a new programme is typically given 18-24 months prior to the intended commencement of the programme. (The Council acknowledges that in some circumstances these timeframes may not be possible).

Qualification providers making public announcements in respect of the proposed new programme (such as promotional material or course information) are to consult with the Council regarding any reference to the Council and the accreditation process.

New programmes are assessed against the same standards as established programmes. Proposals from qualification providers seeking accreditation of a new programme are managed through a two-stage process:

Stage One Assessment

A Stage One assessment is undertaken to determine if the qualification provider's plans are sufficiently well-developed to proceed with the accreditation process and to establish whether the planned curriculum is likely to comply with the Council's Accreditation Standards. Consequently a Stage One submission is a preliminary version of the Stage Two submission.
The qualification provider submits an initial plan of its proposal for the new programme including written assurances\(^3\) from any relevant authorities, approximately 18-24 months prior to the planned introduction of the programme. Where details have not yet been developed, there should be an indication of how further development is to be undertaken.

The Council’s Education Committee then undertakes a Stage One assessment that considers an overview of the programme plans and its curriculum and the resources available to support the proposed programme.

The Education Committee may make one of two recommendations:

1. That the planned curriculum is likely to comply with the Council’s *Accreditation Standards* and that the qualification provider has demonstrated that the new programme can and will be implemented. The Education Committee recommends to the Council that the qualification provider is invited to submit a more detailed accreditation submission.

2. That further development is required before the Council can consider the programme in detail.

**Stage Two Assessment**

In its Stage Two submission the qualification provider presents further details of the programme and the financial, physical and staff resources available to design and implement all years of the programme, and to support the programme when fully established.

The qualification provider is to submit Stage Two documentation according to a schedule as agreed with the Council’s Education Committee.

A Stage Two assessment requires an accreditation review (as outlined in the preceding *Accreditation Review Process* section) including an on-site accreditation visit.

**Maximum Period of Accreditation for New Qualifications**

Accreditation of a new programme can only be granted with conditions for a maximum period of up to two years after the full programme has been implemented. This is subject to conditions being addressed within the specified period and submission of satisfactory reports (either annual or as otherwise stated).

During the initial period of accreditation the Council may undertake a specific evaluation of a programme’s processes for assessing the clinical competence of graduates.

\(^3\) Progression to Stage Two of the assessment process, that is, assessment of the curriculum plans will not proceed without written assurances that the programme can and will be implemented.
Accreditation of a Major Change to an Existing Qualification

Major changes to a qualification programme that is accredited by the Council may affect that programme’s accreditation status and will be subject to an accreditation review.

Definition of Major Changes

The Council considers any of the following as a major change that may affect the accreditation status of an accredited medical laboratory technician qualification programme:

- A change in the length (months/years) of the programme
- A change in the format (delivery style) of the programme
- A significant change in educational philosophy or educational emphasis of the programme or in the institutional setting
- A substantial change in learning objectives in one or more subjects in a year or in subjects across years of the programme
- A significant change in assessment philosophy and/or methods
- The introduction of a new area of study
- A significant change in the patient group/scope of practice
- Discontinuation of a course or part-of a course
- A change in the number of units/time required to complete components of the programme
- Changes to admission and enrolment processes, including arrangements for ongoing monitoring of processes
- A substantial change in student numbers relative to resources
- A change in the nature of funding
- Significant changes forced by a major change in resources leading to an inability to achieve the objectives of the existing programme

The gradual evolution of a programme in response to local initiatives and ongoing review is not considered to constitute a major change.
Notification of Major Change(s)

Inclusion of programme changes in the annual report is one forum the qualification provider can use to inform the Council of planned changes to the programme. However if the change is major the qualification provider must advise the Council as soon as possible through a notification to the Council’s Registrar. This allows for initiation of an accreditation review process well in advance of the proposed changes.
**Review Process for a Major Change(s)**

Notice of intent/annual report received from the qualification provider

**Assessment by an Accreditation Team to Determine:**  
(Note: At the discretion of the Council an Accreditation Team for review of a major programme change may not be the usual full accreditation team)  
- If the change is major but can be approved for introduction within the current accreditation of the qualification and does not require a full accreditation review. In this instance the provider is required to submit a broad outline of the new programme, transitional arrangements for existing students if appropriate, the resources including clinical teaching resources available to deliver the programme, and evidence of engagement of stakeholders  
- If the change is of comprehensive impact that an accreditation review of the whole programme is required  
- If the change is not major and can be considered within the current status and period of accreditation

The Council's Education Committee considers the Accreditation Team's recommendations

Accreditation visit as required

Education Committee considers recommendations of the Accreditation Team following visit and forwards to the Council. Committee may consider revising any recommendation and/or condition associated with the existing accreditation of the programme. In respect of the latter the qualification provider will be consulted and advised

Accreditation decision by the Council
**Unsatisfactory Progress**

The accreditation process encourages further improvements and developments in the qualification programme being assessed. In addition to identifying the relevant achievements and strengths of the qualification provider and the programme, it is expected that the qualification provider and the Accreditation Team will identify areas for improvement. The qualification provider reports on its actions in response to the recommendations and accreditation conditions (as applicable) as contained in the accreditation report through the annual reports it submits to the Council (through the Education Committee).

There may be circumstances where the Education Committee considers, on the basis of annual reports or specific reports submitted by the qualification provider, or through other available material/information, that there may be cause to consider:

- The imposition of new or amended conditions on an existing accreditation; or
- A reduction in the current period of accreditation; or
- The revocation of accreditation

The Education Committee is to inform the Council of its concerns including the grounds on which they are based. The qualification provider is to be given an opportunity to respond to the statement of concerns.

If required, the Council may establish a small committee to investigate the concerns and prepare a report. Membership of that team is determined by the Council in consultation with the Education Committee.

The investigating team may make one of the following recommendations to the Education Committee:

1. The conditions on the accreditation are being met or are likely to be met in the near future. In this circumstance the Council may affirm the accreditation of the programme for a specified period subject to satisfactory periodic reports.

2. The conditions on the accreditation are not being met and are unlikely to be met in the near future. In this circumstance, in accordance with the options for accreditation outcomes the Council may:

   a. Place further conditions on the accreditation. This may include specific actions to be taken or issues to be addressed by the qualification provider and/or further restrict the period of accreditation. The qualification provider may apply for re-instatement of its full period of accreditation at any time subject to the normal procedures for an accreditation review; or

   b. Withdraw accreditation from the programme if it considers the qualification provider is unable to deliver the programme at a standard or in a manner compatible with the Council’s Accreditation Standards. In this circumstance the Council works with the qualification provider to facilitate arrangements for the enrolled students to complete an alternative accredited programme.
Accreditation Fees

Qualification providers of accredited programmes are required to pay a fee to the Council. Further information on accreditation fees is available through the Council's Registrar.
Section Five: Appendices

Appendix One: Curricula - Courses and Topics

Reference: Standard 2: Programme Curriculum

The following table summarises the courses/topics and the core content the Council accredits in respect of the medical laboratory technician scope of practice.

Reference: Medical Laboratory Science Competency Statements

The Council has published a *Code of Competencies for the Practice of Medical Laboratory Science*. This document is available to qualification providers as reference material to inform the development of curricula that aligns with the entry-level competencies required for the medical laboratory technician scope of practice.
Appendix Three: References

The development of these accreditation standards and procedures has been informed by similar standards adopted by other health regulation authorities, both within New Zealand and overseas including:

Accreditation Standards for Primary Medical Qualification providers and their Program of Study and Graduate Outcome Statements. Australian Medical Council.

Procedures for Assessment and Accreditation of Medical Schools by the Australian Medical Council. Australian Medical Council (2011).

Accreditation Standards: Education Programmes for Dentists. Australian Dental Council and Dental Council of New Zealand (June 2010).

Education Programme Standards for the Registered Nurse Scope of Practice. Nursing Council of New Zealand (July 2010).

Standards and Procedures for the Accreditation of Qualifications Leading to Registration as a Psychologist in New Zealand. New Zealand Psychologists Board (February 2012).
